

# IOBC/WPRS Bulletin

## Vol. 23(12) 2000

Working Group "Integrated plant protection in orchards",  
Subgroup "Integrated control of pome fruit diseases" Proceedings  
of the 5th workshop on integrated control of pome fruit diseases,  
Fontevraud (France), 24-27 august 1999. xxiv + 291 pp. Edited  
by: L. Parisi. ISBN 92-9067-128-9

Opening of the 5 <sup>th</sup> Workshop on Integrated Control of Pome Fruit Diseases <i>J.L. Harousseau</i> .....	1
50 years of research on biological control <i>O. Carisse</i> .....	5
Protection of apple against fire blight induced by avirulent mutants of <i>Erwinia amylovora</i> <i>M. Faize, M.N. Brisset, J.P. Paulin, M. Tharaud</i> .....	11
Antagonistic effect of <i>Bacillus subtilis</i> BS 2924 upon fire blight bacteria <i>B.M. Sharga</i> .....	17
Integrated biological control of apple scab <i>O. Carisse, A. Svircev, R. Smith</i> .....	23
Covering apple fruits with multi-layer fruit bags reduces defects <i>J. Hartman, C. Smigell, R. Bessin, G. Brown</i> .....	29
Bion <sup>®</sup> induces systemic defense responses in apple and protects against fire blight infections <i>M.N. Brisset, S. Cesbron, C. Leclerc, L. Sindji, R. Chartier, S.V. Thomson, J.P. Paulin</i> .....	35
Recent research on ascospore discharge in <i>Venturia inaequalis</i> <i>A. Stensvand, D.M. Gadoury, T. Amundsen, R.C. Seem</i> .....	39
A waterbath method for detection of potential ascospore discharge of <i>Venturia inaequalis</i> <i>A. Kollar</i> .....	53
Relationship between assessment of scab on apple leaves in autumn and ascospore production the following spring <i>W.E. MacHardy, L.P. Berkett, A.R. Gottlieb, D.K. Sutton, J. Bergdahl</i> .....	61
Cellulase- and pectinase-zymograms of various <i>Venturia inaequalis</i> - and <i>V. pirina</i> -isolates <i>E. Foshag, A. Kollar</i> .....	77
Development and evaluation of a forecasting system for scheduling fungicide sprays for control of brown spot ( <i>Stemphylium vesicarium</i> ) of pear <i>I. Llorente, P. Vilardell, C. Moragrega, E. Montesinos</i> .....	81
Isolation of strains of <i>Erwinia amylovora</i> resistant to oxolinic acid <i>S. Manulis, F. Kleitman, O. Dror, E. Shabi</i> .....	89
SSR analysis of apple scab lesions <i>B. Koller, I. Tenzer, C. Gessler</i> .....	93
First report on the presence of <i>Venturia inaequalis</i> race 7 in french apple orchards <i>L. Parisi, C.E. Durel, F. Laurens</i> .....	99
Genetic diversity of the apple mildew fungus <i>Podosphaera leucotricha</i> : DNA-markers give surprising results, artefacts or relevant role of sexuality ? <i>C. Gessler, S. Suhner, B. Dorn, B. Koller</i> .....	105
Rural cultivars as an important source of resistance genes <i>V.A. Zayats</i> .....	111

Gene transfer in apple and pear: new strategies for control of fungal and bacterial diseases <i>E. Chevreau</i> .....	115
Increased resistance to scab ( <i>Venturia inaequalis</i> ) of transgenic apple plants expressing chitinases from <i>Trichoderma</i> <i>H.S. Aldwinckle, J.L. Norelli, J.P. Bolar, G.E. Harman</i> .....	119
Field trials of resistance of lytic protein transgenic lines of Royal Gala apple to <i>Erwinia amylovora</i> (fire blight) <i>H.S. Aldwinckle, J.L. Norelli, E. Borejsza-Wysocka, J.P. Reynoird</i> .....	123
Possible errors in genome mapping <i>R. Liebhard, C. Gessler</i> .....	127
Incidence of powdery mildew ( <i>Podosphaera leucotricha</i> ) on scab resistant apple cultivars over different years and places <i>M. Goerre, F. Weibel, M. Kellerhals, C. Gessler</i> .....	137
Post-harvest diseases of apples: chemical and biological control, new data <i>G. Bompeix, D. Cholodowski-Faivre, J. Quennemet</i> .....	147
Assessment of <i>Penicillium</i> risk on pome fruit in storage <i>M. Giraud, J. Fauré</i> .....	153
Pre-harvest assessment of the risk of storage rots in Cox apples <i>A.M. Berrie</i> .....	159
A review of apple scab research presented at IOBC "Integrated Control of Pome Fruit Diseases" workshops, 1987-1999 <i>W. MacHardy</i> .....	171
<i>Acremonium strictum</i> : a potential antagonist of <i>Venturia inaequalis</i> <i>C. Gessler, B. Reidy, T. Löstschner, K. Schlöffer</i> .....	183
Prebloom fire blight symptoms on <i>Crataegus</i> , <i>Cotoneaster</i> and apple <i>E. Billing, A.M. Berrie</i> .....	187
Study of spatial distribution of <i>Venturia inaequalis</i> ascospores in a commercial apple orchard <i>J. Charest, P. Dutilleul, M. Dewdney, T. Paulitz, V. Pheilion, O. Carisse</i> .....	191
Relative cultivar susceptibility to <i>Venturia inaequalis</i> ascospores under greenhouse conditions <i>M. Dewdney, B. d'Estienne, J. Charest, T. Paulitz, O. Carisse</i> .....	199
Analysis of 1998 scab epidemic in an experimental apple orchard planted with cultivar mixtures <i>F. Didelot, K. Delhaye, L. Brun, L. Parisi</i> .....	207
Warning systems for the prediction of <i>Venturia inaequalis</i> infections and inoculum quantification methods <i>R. Fiaccadori, A. Cesari</i> .....	211
New disease outbreaks and epidemiological studies of fire blight ( <i>Erwinia amylovora</i> ) in Spain <i>E. Montesinos, I. Llorente, E. Badosa, P. Vilardell</i> .....	217
Occurrence in France of <i>Pseudomonas syringae</i> pv. <i>papulans</i> , the causal agent of blister spot on apple <i>M. Kerkoud, C. Manceau, M. Menard, L. Gardan, R. Samson, J.P. Paulin</i> .....	221
Occurrence of races of <i>Venturia inaequalis</i> in an apple scab race screening orchard in Denmark <i>M. Bengtsson, H. Lindhard, J. Grauslund</i> .....	225
Evaluation of the pathogenicity of two scab isolates derived from the Vf-resistant apple cultivar 'Baujade' <i>V. Bus, K. Plummer, E. Rikkerink, J. Luby</i> .....	231
Expression of Golden Delicious resistance to race 7 of <i>Venturia inaequalis</i> <i>M. Chevalier, L. Parisi</i> .....	239

Localisation of a major gene for apple scab resistance on the European genetic map of the Prima x Fiesta cross <i>C.E. Durel, E. van de Weg, J.S. Venisse, L. Parisi</i> .....	245
Transfer of resistances to Valsa canker and powdery mildew from wild <i>Malus</i> species to cultivated apples <i>K. Abe, J. Soejima, N. Kotoda, H. Kato, S. Komori</i> .....	249
A European project : d.a.r.e. – Durable Apple Resistance in Europe (fair5 ct97-3898). Durable resistance of apple to scab and Powdery-mildew: one step more towards an environmental friendly orchard <i>Y. Lespinasse, C.E. Durel, L. Parisi, F. Laurens, M. Chevalier, C. Pinet</i> .....	257
Preliminary evaluation of new gene transfer strategies for resistance to fire blight in pear <i>M. Malnoy, E. Chevreau, J.P. Reynoird</i> .....	261
Selection of apple cultivars with low-susceptibility to fire blight ( <i>Erwinia amylovora</i> ) using a two-step strategy. <i>A. Ortiz-Barredo, A. Martinez, E. Montesinos, B. Lizar, J. Murillo</i> .....	265
Scab resistant apple trees and integrated pest management <i>V. Mercier, F. Combe, H. Defrance, G. Fauvel, G. Marboutie, S. Simon</i> .....	271
Durability of scab ( <i>Venturia inaequalis</i> ) resistance in apple and combination of different resistance sources. <i>A. Duponcheel, E. Pauwels, J. Keulemans</i> .....	277
Identification of molecular markers linked to mildew resistance genes <i>Pl-w</i> and <i>Pl-d</i> in apple <i>K.L. Phillips, C.M. James, J.B. Clarke, K.M. Evans</i> .....	287
Acknowledgments .....	291
Organizing and Scientific Committees .....	291
