

IOBC/wprs Bulletin Vol. 24(1) 2001

“Tri-trophic interactions in the rhizosphere and root-health nematode-fungal-bacterial interrelationships”. Study Group “Integrated Control of Soil Pests”, Proceedings of the meeting at Bad Honnef (Germany), 3-5 November, 1999. vi + 172 pp. Edited by: R. Sikora. ISBN 92-9067-130-0

Studies on biological control of charcoal rot of cowpea (<i>Vigna unguiculata</i>), caused by <i>Macrophomina phaseolina</i> , with bacterial antagonists <i>Afouda, L., Kerstin Wydra, D. Schulz & G. Wolf</i>	1
The susceptibility of the root-knot nematode <i>Meloidogyne javanica</i> to the bacterium <i>Pseudomonas oryzae</i> isolated from the entomopathogenic nematode <i>Steinernema abbasi</i> (Steinernematidae: Nematoda) <i>Fotini Andreoglou, Harry Samaliev, Sami Elawad, Nigel Hague & Simon Gowen</i>	5
Efficient Biological Control of fungal plant diseases by <i>Streptomyces rimosus</i> DSMZ 12424 <i>Gabriele Berg, Petra Marten, Arite Minkwitz, Stephan Brückner & Peter Lüth</i>	9
Thermophilic compost to increase onion plant health <i>Pedro Boff, João F. Debarba, Edson Silva & Hernandes Werner</i>	15
Symbiosis-related genes of <i>Medicago truncatula</i> induced in the early phase of its interaction with <i>Glomus intraradices</i> <i>Athos Bonanomi, Jürg H. Oetiker, Thomas Boller, Andres Wiemken & Regina Vögeli-Lange</i>	19
Making a soil suppressive to root-knot nematodes by applications of <i>Verticillium chlamyosporium</i> <i>J.M. Bourne</i>	25
Comparison of different fatty acid methyl esters extraction methods in the determination of rhizosphere specific microbial communities of two wheat varieties <i>Hanan G. Diab El Arab, Vivian Vilich & Richard A. Sikora</i>	31
<i>Pasteuria penetrans</i> : can it be used to manage root-knot nematodes? <i>S. R. Gowen & B. Pembroke</i>	41
Biological control of root diseases of tomato in hydroponics <i>Rita Grosch & Dietmar Schwarz</i>	45
Biological control of <i>Phytophthora</i> diseases on strawberry with rhizobacteria <i>M.K. Gulati, E. Koch, R.A. Sikora & W. Zeller</i>	51
Studies to improve beet cyst nematode control with the nematophagous fungus <i>Hirsutella rhossiliensis</i> by providing <i>Aphelenchus avenae</i> as an additional host <i>Volker Gutberlet & Joachim Müller</i>	57
Methods to monitor growth and activity of nematode-trapping fungi in soil <i>Hans-Börje Jansson</i>	65
Influence of plant rotation on the structure of soil fungal communities from under Scots pine seedlings in forest nurseries <i>Ma³gorzata Kacprzak & Ma³gorzata Mañka</i>	69
Measurement of the impact of <i>Verticillium chlamyosporium</i> on the dynamics of sedentary nematodes in the rhizosphere <i>Brian R. Kerry, S.D. Atkins, T.H. Mauchline & P.R. Hirsch</i>	73

Advanced fermentation and formulation technologies for fungal antagonists <i>Sebastian Kiewnick</i>	77
Effect of biocontrol agents on plant growth in the absence of pathogens <i>Eckhard Koch</i>	81
Microbial community of <i>Meloidogyne</i> egg masses <i>C.J. Kok & A. Papert</i>	91
Effect of the host-plant and the soil-type on the diversity of soilborne populations of fluorescent pseudomonads and of <i>Fusarium oxysporum</i> <i>P. Lemanceau, V. Edel, C. Steinberg, X. Latour & C. Alabouvette</i>	97
Health status of cereals cultivated in different systems with a special respect to ecological cultivation <i>Aleksander Lukanowski, Anna Baturo-Czajkowska & Czeslaw Sadowski</i>	101
Soil fungal communities versus soil-borne pathogenic fungi <i>Ma³gorzata Manka, Ma³gorzata Kacprzak & Sylwia Stepińska</i>	107
Side effects of herbicides on some soil fungi and plant tissues <i>Ewa B. Moliszewska</i>	111
Mutualistic endophytic fungi – role in biocontrol and safety of application <i>Björn Niere, Richard Sikora & Paul Speijer</i>	117
Growth of nematode-trapping fungi determined using a radioactive tracing method <i>Christina Persson</i>	121
Methods of measuring the fungal component of suppressive soils <i>Aris Pyrowolakis, R.-P. Schuster & Richard A. Sikora</i>	127
Bacteria-mediated induced systemic resistance in potato towards the cyst nematode <i>Globodera pallida</i> <i>Martina Reitz & Richard A. Sikora</i>	133
Different formulation methods for microbial inoculants for use in biological control <i>Thomas Rose & Klaus-Dieter Vorlop</i>	139
Molecular modifications in plant-endomycorrhizal fungal interaction <i>Shaul Orna, Rakefet David-Schwarze, Galit Sinvany, Hana Badani, Smadar Wininger, Bruria Ben-Dor, Nachum Ovdad, Nir Atzmon, Idit Ginzberg & Yoram Kapulnik</i>	143
Efficiency of screening methods of biological control agents against the pea pathogen <i>Mycosphaerella pinodes</i> <i>Reinhold Siede & Hans-Heinrich Hoppe</i>	147
The role of fungi in reduction of sugar beet nematode (<i>Heterodera schachtii</i> Schmidt) population <i>Danuta Sosnowska</i>	151
Is it possible to use biological control for prevention of Pythium Root Rot in cucumber? <i>Kirsten Thinggaard</i>	157
Promotion of root development and root growth of forest plants by rhizobacteria <i>Imtraut Zaspel & Dietrich Ewald</i>	161
