## Preface

Regular publication of scientific results and information in Bulletins, special books and brochures is a core activity of the 21 Working Groups and the five Commissions presently working under the IOBC/wprs. What has started in the late 1960's has perpetuated for more than 40 years now, and it has grown considerably during the last 20 years. The IOBC/wprs Working Groups and Commissions produce on average between 2000 and 3000 printed pages of new knowledge every year, and thus contribute to a steady improvement of Integrated Crop Protection and Integrated Production. The way of disseminating new findings and information has changed tremendously since the first IOBC/wprs publications were released, and today approximately all printed materials back to 2000 are now accessible for our members on the website: <http://www.iobc-wprs.org>.

Despite the beauty of a quick and almost unlimited access to the recent IOBC/wprs publications on the website, we have decided to produce an index containing all publications released from 1994 to 2010. This new list complements the older one in which approximately all published IOBC/wprs materials from 1968-1993 are compiled. The index keeps the structure of the first list as it has proven to be useful and easy to read. The value of the new list relies in the well structured overview of all publications, and it will guide the reader quickly the sources that are not available otherwise.

The two lists together cover all material produced since the beginning of regular publications by IOBC/wprs, and it will thus be easy to trace those publications not accessible on the homepage or out of print. Copies of such publications can be ordered from the IOBC/wprs archive where a complete stock of all published material is preserved.

I am grateful to Horst Bathon who was a member of the Publication Commission of the IOBC/wprs for many years to have assembled with endurance all published material and prepared this list.

Franz Bigler  
(President of IOBC/wprs)
