Time-Table of Forthcoming Events .................................................................................... 44
Dear Reader,

Under the Convention on Biological Diversity (CBD), it is now internationally recognised that countries have sovereign rights over the genetic resources within their boundaries. Agreements governing the access to these resources and the sharing of the benefits arising from their use should be established between the parties involved. This applies to all Biological Control Agents taken from one country to another. The biological control community will need to comply with whatever Access and Benefit Sharing (ABS) regime is agreed by the 10th meeting of the Conference of the Parties to the CBD in 2010.

Most of the Biological Control (BC) Community is unaware or just beginning to understand the possible implications of ABS, and it is appropriate to reiterate some basic points of the CBD relating to BC. The three objectives of the CBD are: a) the conservation of biological diversity; b) the sustainable use of its components and c) the fair and equitable sharing of the benefits arising out of the utilisation of genetic resources.

Recognizing the possible implications of the CBD on BC, the IOBC Global has created a few months ago a “Commission on Biological Control and Access and Benefit Sharing”. With support from FAO and CABI, the Commission has prepared a report which sets out to summarise the past and current situation regarding the practice of biological control in relation to the principles of access and benefit sharing, with the following objectives:

1. Facilitate the practice of collection and exchange of biological control agents (BCAs) in the context of ABS;
2. Inform the BC community of good ABS practice and challenges;
3. Inform the ABS community (including national focal points) of BC special needs;
4. Propose a workable framework for collection and exchange of BCAs to assist policy makers and practitioners.

The Commission concludes from the report that the BC community acknowledges and respects the concerns surrounding ABS and the sovereign rights of countries. ABS regulations should recognise the specific features of BC, which are:

1. Countries providing BCAs are also users of this technology themselves;
2. Many BCAs are exchanged, but have little recoverable monetary value;
3. Organisms are not be patented, so can be used by anyone at any time;
4. CBC information and to a degree ABS information are publicly shared;
5. Indigenous/traditional knowledge is not involved;
6. There are societal benefits for all, such as environmental and public health benefits, and reduction in pesticide use;
7. BC is widely used in both developing and developed countries, often using the same BCAs;
8. Most use of BC relates to food, forestry and agriculture.

In view of these specific positive features, the Commission recommends:

1. Governments should build on the existing multilateral practice of exchange of natural enemies for BC on a complementary and mutually reinforcing basis, which ensures fair and equitable sharing of the benefits of BC worldwide.
2. ABS regulations should encourage and not block the BC sector, by facilitating the multilateral exchange of BCAs.
3. Countries are encouraged to have a single point of contact to facilitate survey missions, provision of information, institutional linkages and taxonomic support and provide advice on compliance with regulations for BC, including ABS.

4. ABS in relation to BC will normally be based on non-monetary benefit sharing, e.g. capacity building, shared research programmes and/or technology transfer, as already practised by several organisations and the industry.

5. A document describing best practices for ABS in relation to BC including guidelines for joint research that are equitable, but not restrictive, should be prepared and disseminated. BC organisations would be expected to follow these guidelines.

6. To improve transparency in the exchange of BCAs, mechanisms to establish and allow free access to database information on BCAs including source and target countries globally should be supported.

7. In the case of a humanitarian or emergency situation, governments should cooperate within FAO to fast track action.

The full report is presently reviewed by FAO and will soon be available on the homepages of IOBC Global, IOBC/WPRS, FAO and others.

Franz Bigler

IOBC/wprs Officers and their Addresses

All Officers are asked to send corrections and additions to this compilation of addresses to the editor of *Profile* and to the treasurer.

1 – Executive Committee

**Bigler**, Dr. Franz (President), Federal Department of Economic Affairs DEA, Agroscope Reckenholz-Tänikon Research Station ART, Biosafety Group, Reckenholzstrasse 191, CH-8046 Zürich (SWITZERLAND), Tel: +41-44-3777111, Fax: +41-44-3777201, e-mail: franz.bigler@art.admin.ch, URL: [www.reckenholz.ch](http://www.reckenholz.ch)

**Blümel**, Dr. Sylvia (Vice-President), Austrian Agency for Health and Food Safety (AGES), Institute of Plant Health (PGH), Spargelfeldstrasse 191, P.O.Box 400, A-1126 Wien (AUSTRIA), Tel: +43-50555-33300, Fax: +43-50555-33303, e-mail: sylvia.bluemel@ages.at

**Tirry**, Prof. Dr. Luc (Vice-President), Ghent University, Laboratory of Agrozoology, Department of Crop Protection, Coupure Links 653, B-9000 Gent (BELGIUM), Tel: +32-9-2646152, Fax: +32-9-2646239, e-mail: luc.tirry@ugent.be

**Vogt**, Dr. Heidrun (Vice-President), Julius Kühn-Institute (JKI), Federal Research Centre for Cultivated Plants, Institute for Plant Protection in Fruit Crops and Viticulture, Schwabenheimer Strasse 101, D-69221 Dossenheim (GERMANY), Tel: +49-6221-8680530, Fax: +49-6221-8680515, e-mail: heidrun.vogt@jki.bund.de

**Nicot**, Dr. Philippe C. (Secretary-General), INRA, Unité de Pathologie Végétale, Domaine St. Maurice, B.P. 94, F-84143 Montfavet Cedex (FRANCE), Tel: +33-432722841, Fax: +33-432722842, e-mail: nicot@avignon.inra.fr

**Albajes**, Prof. Dr. Ramon (Treasurer), Universitat de Lleida, Centre UdL-IRTA, Rovira Roure, 177, E-25006 Lleida (SPAIN), Tel: +34-973-702571Fax: +34-973-238301, e-mail: ramon.albajes@irta.es

2 – Council

**Besri**, Prof. Dr. Mohamed, Institut Agronomique et Vétérinaire Hassan II, Département de Phytopathologie, BP 6202, Rabat-Instituts (Marocco), Tel: +212-3777-8364, Fax: +212-3777-8364, e-mail: m.besri@iav.ac.ma

**Ekbom**, Prof. Barbara, Swedish University of Agricultural Sciences, Department of Entomology, P.O.Box 7044, SE-750 07 Uppsala (SWEDEN), Tel: +46-1867-2625, Fax: +46-1867-2890, e-mail: barbara.ekbom@entom.slu.se

**Huber**, Dr. Jürg, Julius Kühn-Institute (JKI), Federal Research Centre for Cultivated Plants, Institute for Biological Control, Heinrichstrasse 243, D-64287 Darmstadt (GERMANY), Tel: +49-6151-407220, Fax: +49-6151-407290, e-mail: juerg.huber@jki.bund.de

**Sigsgaard**, Dr. Lene, Royal Veterinary and Agricultural University, Department of Ecology - Zoological Group, Thorvaldssensvej 40, DK-1871 Frederiksberg C (DENMARK), Tel: +45-35282674, Fax: +45-35282670, e-mail: les@life.ku.dk
Weintraub, Dr. Phyllis G., Gilat Research Station, Entomology Unit, D.G. Negev 85280 (ISRAEL), Tel: +972-8-9928678, Fax: +972-8-9926485, e-mail: phyllisw@volcani.agri.gov.il

Whipps, Prof. Dr. John, Warwick HRI, University of Warwick, Wellesbourne, Warwick CV35 9EF (UK), Tel: +44-24-76575084, Fax: +44-24-76574500, e-mail: john.whipps@warwick.ac.uk

Deputy Members

Vieira, Dr. Maria Margarida, Direcção-Geral de Protecção das Culturas, Quinta do Marquês, P-2780-155 Oeiras (PORTUGAL), Tel: +351-21-4464000, Fax: +351-21-4420616, e-mail: margaridav@dgpc.min-agricultura.pt

Villemant, Dr. Claire, Museum National d'Histoire Naturelle, USM 601, UMR 5202 CNRS-MNHN, CP 50, Entomologie, 45, rue Buffon, F-75005 Paris (FRANCE), Tel: +33-1-40793841, Fax: +33-1-40793699, e-mail: villeman@mnhn.fr

3 – Auditing Committee

Adler, Dr. Cornel, Julius Kühn-Institute (JKI), Federal Research Centre for Cultivated Plants, Institute for Ecological Chemistry, Plant Analytics and Stored Product Protection, Königin-Luise-Strasse 19, D-14195 Berlin (Germany), Tel: +49-30-83042502, Fax: +49-30-83042503, e-mail: cornel.adler@jki.bund.de, http://www.bba.de

Freuler, Dr. Jost A., Station Fédérale de Recherche en Production végétale de Changins, Route de Duillier, Case postale 254, CH-1260 Nyon (Switzerland), Tel: +41-22-3634383, Fax: +41-22-3634394, e-mail: jost.freuler@bluewin.ch

Rezapanah, Dr. Mohammadreza, Biocontrol Control Research Dept, Plant Pests and Diseases Research Instiute (PPDRI), Agricultural Research and Education Organization (AREO), P.O. Box: 19395-1454, Velenjak, Tehran (Iran), Tel: +98-21-2420224 / +98-21-2420225, Fax: +98-21-2403691, e-mail: rezapana@yahoo.com, http://www.areeo.or.ir

Royle, Dr. David J., East End Stable, Nowhere Lane, Nailsea, Bristol BS48 2PT (UK), Tel: +44-12-75857197

4 – Convenors of the Commissions, Working Groups (their Sub Groups), and Study Groups

Athanassiou, Prof. Christos G., Laboratory of Agricultural Zoology and Entomology, Agricultural University of Athens, 75 Iera Odos, 11855, Athens (GREECE), Tel: +30-2105294582, Fax: +302105294577 e-mail: athanas@aua.gr, xathanas@uth.gr

Bale, Prof. Dr. Jeff, School of Biosciences, University of Birmingham, Edgbaston, Birmingham, B15 2TT (UK), Tel: +44-121-414 5908 e-mail: j.s.bale@bham.ac.uk

Bathon, Dr. Horst, Julius Kühn-Institute (JKI), Federal Research Centre for Cultivated Plants, Institute for Biological Control, Heinrichstrasse 243, D-64287 Darmstadt (GERMANY), Tel: +49-6151-407225, Fax: +49-6151-407290, e-mail: horst.bathon@jki.bund.de

Baur, Hannes, Natural History Museum, Department of Invertebrates, Bernastrasse 15, CH-3005 Bern (SWITZERLAND), Tel: +41-31-3507264, Fax: +41-31-3507499, e-mail: hannes.baur@nmbe.ch, http://www.nmbe.ch

IOBC/wprs
COMMISSIONS AND WORKING GROUPS

Working Group “GMOs in Integrated Plant Production
Report on the Meeting at Rostock, 2009 (Germany)

WG meeting
The WG has held it’s forth EIGMO (Ecological Impact of Genetically Modified Organisms) meeting from May 14 - 16, 2009 in Rostock, Germany. The local organizing committee was chaired by THOMAS THIEME from the BTL Bio-Test Labor GmbH Sagerheide.

The meeting was a great success with a total of 71 participants from 14 countries attending. The program consisted of 24 oral contributions and 22 posters plus three keynotes:

EMILIO RODRIGUEZ-CEREZO (European Commission-Joint Research Centre, Seville, Spain): Agronomic and economic impacts of Bt maize in Spain: evidence from a large survey of commercial farms

GRIFFITHS BRYAN S (Teagasc, Environmental Research Center, Ireland): ECOGEN– Soil ecological and economic evaluation of genetically modified crops

GHAREYAZIE BEHZAD (Center for Strategic Research, Tehran, Iran): Biosafety concerns of the world’s first commercialized Bt rice

Focus of the scientific programme were the environmental risk assessment of GM crops, non-target impacts of insecticidal GM crops and the environmental impacts of disease-resistant GM wheat. Besides a very interesting scientific programme we also had a chance to visit the AgroBiotechnikum in Groß Lüsewitz

Re-election of the WG convenor
During the Rostock meeting, JÖRG ROMEIS was re-elected as the WG convenor for a second term by the 18 members of IOBC/WPRS that were present and had a right to vote.
Special WG activity
During the Rostock meeting a new special WG activity was announced. It will deal with the environmental risk assessment of non-pesticidal GM crops and include an expert workshop organized in Switzerland in September 2009. Results from this workshop will be presented at the next WG meeting.

Jörg Romeis
Working Group convenor
Agroscope Reckenholz-Tänikon Research Station ART, Zürich
July 3, 2009

Meeting of the IOBC/WPRS Working group
“Integrated Protection and Production in Viticulture” – Staufen/Breisgau, Germany, 1 – 4 November, 2009

Dear colleagues,
The next meeting of the IOBC/WPRS Working group “Integrated Protection and Production in Viticulture” will take place from 1st to 4th of November 2009 in Staufen im Breisgau (Germany) This venue is an idyllic, medieval town, situated ca. 12 km in the South of Freiburg im Breisgau and is easy accessible by train or bus; the next airport is Basel-Mulhouse (50 km) (http://www.stadt-staufen.de/). The meeting will be held in the Musikakademie Staufen (Academy of Music), a conference centre with an auditorium and some lecture rooms. A guest house is affiliated, so we have board and lodging for all participants during the meeting.

In the program two and a half days are scheduled for oral presentations and poster sessions. In addition, an excursion into the surrounding viticultural region of the Markgräflerland (http://www.markgraefler-land.com/) and the experimental farm of the State Institute for Viticulture and Oenology, Freiburg, in the Kaiserstuhl is planned.

Contributions
The meeting seeks to assemble colleagues from all the fields of integrated plant protection in viticulture in order to constitute a platform for a stimulating discussion. Therefore, we invite you to present oral and/or poster contributions from all the fields of integrated plant protection in viticulture. The meeting will address the following topics:

– Biological – biotechnological control methods – Host Plant interactions
– Biology and epidemiology of pathogens – Forecast modeling
– Biology and population dynamics of insects and moths and modeling

The contributions will be published in the IOBC/wprs Bulletin.

Registration and abstract submission
The registration fee will be for members 210,-- € / non members 260,-- € including the book of abstract, boarding during the meeting including coffee breaks during the meeting, social gathering and excursion.
Further information and detailed instructions for the registration and submission of oral or poster contributions will be provided in the second announcement, distributed at the beginning of 2009.

„Semio-chemicals without Borders”
Joint Conference of the Pheromone Groups of IOBC WPRS and IOBC EPRS
Budapest, Hungary, 15 – 20 November 2009

Dear Colleagues,
You are cordially invited to the meeting SEMIO-CHEMICALS WITHOUT BORDERS a joint conference of Working Groups „Pheromones and other semio-chemicals in integrated production” IOBC WPRS and „Selective Control Methods” of IOBC EPRS:

Budapest (Hungary), Sunday 15 November to Friday 20 November 2009

Semio-chemicals act as information-transferring agents of the most ancient type of communication between living organisms. Research on semio-chemicals is conducted extensively worldwide. Overviewing of the recent results and discoveries in this is the aim of the present conference. People interested in semio-chemicals are invited to present their recent research.

The conference will take place within the 25-year anniversary of the first joint WPRS-EPRS Pheromone Conference (held at Balatonalmádi, Hungary in 1984). This was one of the reasons why we selected Hungary as the site of the anniversary joint meeting.

This second announcement provides the final date and location of the meeting, a registration form and other information for your convenience. A third (and last) announcement will follow in September 2009 with additional information. A website <http://julia-nki.hu/iobcferoconf09/> is under construction.

We look forward to seeing you at the conference.
Please forward this message to colleagues potentially interested in the conference topic.
In case you have questions please do not hesitate to contact at IOBCferoconf09@julia-nki.hu or the organizers:

Miklós Tóth (Plant Prot. Inst., HAS, Budapest, POB 102, H-1525 Hungary, tel. +36-1-3918639, fax: +36-1-3918655, e-mail: h2371tot@ella.hu)

Marco Tasin (FEM-IASMA Research Center, I-38010 San Michele a/A, Italy, tel:
Important deadlines:

Regular Registration: until July 31, 2009
Late Registration: after July 31, 2009

Registration

Register by e-mailing, faxing or sending the filled in registration form (which are attached to this message, or later can be downloaded from our website <http://julia-nki.hu/iobcferoconf09/> in .DOC or .PDF formats)

The IOBC has funds to partly support student travels. Only students who will submit an abstract for a poster or an oral presentation will be eligible for a support. Please provide a short application (copy of your travel ticket, short CV and abstract of your presentation) to marco.tasin@iasma.it

Registration fees

The registration fee includes access to the scientific sessions, all the lunches, coffee breaks, as well as meeting materials. In the congress fee, tickets for public transport for the inner circle of Budapest are included and will be distributed at registration.

Please note, registration will not be processed without accompanying payment of fees.

*Please note that these rates apply ONLY FOR IOBC MEMBERS. If you are not a member, please register directly by IOBC at: http://www.unipa.it/iobc/view.php?pg=membership. We shall require a declaration from each participant, that he/she is:

1) a member of IOBC
2) at the moment of registration to the conference is not yet a member, but will register directly by IOBC at his/her earliest convenience.

Payment
There are two options for payment:
Money order, or paying in cash on the spot at the registration desk

**Money Order**
We need the full name of the participant for payment identification - not the name of the payer if this is someone else!
Please transfer the money to our Conference Account:

- **Owner**: MTA Növényvédelmi Kutatóintézete (Plant Prot. Inst. HAS)
- **Owner address**: Herman O. u. 15, H-1022 Budapest, Hungary
- **Bank**: Magyar Nemzeti Bank (Hungarian National Bank), Budapest, Szabadság tér 15, H-1054 Hungary
- **Account No.**: 10032000-01730762-00000000
- **IBAN number**: HU40 1003 2000 0173 0762 0000 0000
- **Swift Code**: MANEHUHB
- **ID message**: IOBCFeroconf09/Participant’s Name

Any additional expenses pertaining to banking operations are not included in the registration fee and must be covered by the registrants.

Cancellations are only accepted in written form by e-mail, fax or letter. Cancellations received before 1 August 2009 will receive a full refund, less an administration charge of 25 Euro. Thereafter refunds will not be available. However, you may nominate a substitute participant without additional cost until 1 November 2009.

Cancellation charges for accommodation: in case of need please discuss options directly with your hotel.

**Conference Location**

The scientific sessions of the conference will be held in the conference rooms and other facilities of Hotel Agro Panorama, Budapest, Normafa út 54, H-1121 Hungary, Tel: (+36-1) 458-3900, Fax: (+36-1) 458-3901, (+36-1) 375-6164

Contact person for hotel room reservations:
Lívia Horváth, horvath.livia@dlx.hu, Phone/Fax: (+36-1) 458-3959, Mobile phone: (+36-70) 618-9052
Web: www.hotelagropanorama.hu
For a map see http://www.1hungary.com/map/I201505

**Accomodation**

We have negotiated special arrangements and reserved a block of rooms for the participants of the Conference at the Hotel Agro Panorama, Budapest. The block of rooms has been reserved for the following dates: arrival, Sunday 15 November 2009 and departure, Friday 20 November 2009.

Rates: Single (Euro 50.00/room/night) Double (Euro 60.00/room/night), room rates include a breakfast buffet, use of swimming pool, sauna, gym room and all taxes.

We encourage you to make the hotel reservations directly with the hotel at the same time as your registration to secure this excellent price and assure room availability. Budapest is a popular destination for conferences and holidays and hotel accommo-
Looking forward to welcome you in Budapest!
Kindest regards,
Éva Csonka

Study Group “Benefits and risks associated with exotic biological control agents”
1st Meeting of the new IOBC/wprs Study Group, Engelberg (Switzerland), September 6-9, 2009

Dear Colleagues,

Please note that registration is available since 1 April 2009 and submissions for oral presentations and for posters are called for.

Ensure that your submission arrives by 15 June, 2009 at the very latest. For more detailed information and to submit your abstract please visit the conference webpage www.iobc-harmonia-meeting.com

Take advantage and register early until 15 May 2009 to avoid the additional late registration charge and at the same time book your accommodation to secure the especially arranged conference rates and room availability but **latest by 1 July 2009**.

We are looking forward to arranging a stimulating meeting and hope that you will manage to participate. In case you have questions, please don’t hesitate to contact info@iobc-harmonia-meeting.com

Place: Hotel Europe, Engelberg, Switzerland (a beautiful village in the middle of the Swiss Alps)

With best wishes,

Marc Kenis and Dirk Babendreier
CABI Europe-Switzerland, Delémont, Switzerland

Alexandre Aebi
Agroscope Reckenholz-Tänikon, Zurich, Switzerland

Next meeting of the Working Group “Integrated Control in
Protected Crops, Mediterranean Climate”
Chania, Crete (Greece), 6 – 11 September, 2009

Next meeting of this working group is organized by our Greek colleagues leaded by Dr. Dionysios Perdikis from the Agricultural University of Athens. The meeting will be held at the Mediterranean Agronomic Institute of Chania (MAICh). This is one of the most beautiful cities of Greece which is located at the north-eastern part of Crete Island.

The provisional program will consist of 3 days of presentations and discussions, on Monday 7th, Tuesday 8th and Friday 10th, and one day, Wednesday 9th for visiting the
greenhouse industry that is well developed in the island. The topic of the different sessions is detailed in the program schedule on page 18.

During the meeting the green bulletin with the contributions of all participants will be available, since it is now in the process of being printed. This will be possible by the hard work done by all participants preparing their manuscripts on time and by the generous dedication of Prof. Luc Tirry in charge of the printing process.

Updated information about the meeting is available on the web site www.aua.gr/IOBC were participants can register and look for accommodation and travel recommendations.

Working Group “Integrated Protection of Olive Crops” Meeting in Cordoba (Spain), 2009 (Report)

In June 1-4, 2009 The 4th European Meeting of the IOBC/WPRS Working Group: “Integrated Protection of Olive Crops” was held in Cordoba (Spain) in June 1-4, 2009. Chairperson was Dr. E. QUESADA-MORAGA, (Agricultural and Forestry Engineering School, Department of Agricultural and Forestry Sciences, University of Cordoba).

131 scientists from 11 countries attended the meeting, which included 1 keynote address, 4 plenary lectures, 44 oral and 37 poster presentations. The presentations covered several aspects of various insect pests and diseases of olives within the framework of integrated protection of olive crops. The following topics were handled over the three days of the meeting in a total of 5 sessions:

- The olive pest and disease status around the world
- Sustainable olive production and chemical control of pests and diseases: opponents or components?
- Sustainable olive production through crop management
- Sustainable olive production through SIT and semiochemical-based management strategies
- Sustainable olive production and biological control of pests and diseases

The third day of the meeting a technical visit was organized to the Carbonell olive factory and olive oil museum and also a visit was organized to four hedge olive groves (high density orchards) in the Guadalquivir valley under different degrees of development.

Future Activities
The 5th meeting of the Working Group will be held in Israel 2011.
Publications

Proceedings of the 3rd European meeting of the IOBC/WPRS Working Group “Integrated Protection of Olive Crops” that was be held in Braganca, from October 10-12, 2007, Editor: A. Kalaitzaki, are still in preparation.

Full articles of the 4th European meeting in Córdoba on June 1-4, 2009 will be published as an IOBC/WPRS Bulletin. Authors should give their full papers (hard copy, diskette or CD in a WORD format) by e-mail to akalaitzaki@nagref-cha.gr or by mail to the address: NAGREF-Institute of Olive Tree and Subtropical Plants, Dr. Argyro Kalaitzaki, Agrokipio 73 100 Chania Greece until 31st of October 2009.

Best regards

Working Group “Induced Resistance in Plants against Insects and Diseases”
Meeting in Granada (Spain), 2009 (Report)

The IOBC/WPRS working group “Induced Resistance in Plants against Insects and Diseases” held its recent meeting from 12 to 16 May 2009 in Granada, Spain. The local organisers were Dr. MARIA JOSE POZO, EEZ, CSIC, Granada and Dr. VICTOR FLORS, Universitat Jaume I, Castellon. Meeting place was the Estación Experimental del Zaidín, CSIC (Consejo Superior de Investigaciones Científicas) in Granada. The meeting was attended by 113 scientists from 22 countries, working on entomological and phytopathological, molecular and ecological as well as applied and fundamental aspects of induced resistance/induced tolerance. Discussions and exchange between scientists in the different fields was very lively and fruitful. As in former meetings, many PhD students and postdocs were attending and presented their work. Although the meeting covered all aspects of induced resistance and induced tolerance, this time the meeting was entitled “Induced resistance – chances and limits”, leading to the following three sessions:

“Chances and limits in multitrophic interactions”, “Chances and limits of model systems” and “Chances and limits in crop protection”.

The book of abstracts can be downloaded under: www.fvccee.uji.es

During the meeting, election of the convenor took place, where Dr. Annegret Schmitt, JKI, Darmstadt, Germany, was re-elected for a period of 5 years.
The next meeting of the working group will be held in Neuchâtel, Switzerland in 2011.

Annegret Schmitt (convenor),
JKI Darmstadt, Germany

Heinrich Höhn takes over the IOBC-Archive from Ernst Boller

ERNST BOLLER, Honorary member of IOBC, has established the archive of IOBC/ WPRS and IOBC Global during the last two years at Agroscope ACW in Waedenswil, Switzerland. Important and interesting IOBC documents from many different sources were traced by him, then classified and arranged systematically, first physically on shelves and later in a database. On behalf of IOBC/WPRS I would like to express my deep gratitude to Ernst for his invaluable dedication for the archive and for IOBC as a whole.
I am happy to welcome HEINRICH HÖHN as the new archivist of IOBC. Heinrich is an entomologist who has been active in IOBC/WPRS since long, and he knows our organization form in- and outside. I am very greatful to Heinrich to take over from Ernst and to continuously expand the archive with valuable IOBC documents.

Franz Bigler
President IOBC/WPRS

Dr. HEINRICH HÖHN (Archive of IOBC/wprs),

Database on Diagnosis of Arthropod Diseases in the Website of the Julius Kühn Institut (Germany)

Since March 2009, a database on diagnosis of diseases of insects and other arthropods is available in a German and English version under the internet file

http://arthropodenkrankheiten.ki.bund.de.

It is based on 55 years of diagnostic investigations of living, diseased, or dead arthropods, particularly insects, at the “Institute for Biological Control” in Darmstadt, Germany. The studies have been primarily conducted by Dr. A.M. HUGER and since 1991 by Dr. R.G. KLEESPIES as well as by further scientists of the institute. The database comprises results of 1951 accessions with several thousands of diagnosed specimens
from 1953 to 2008. About 450 arthropod species of the following orders were investigated (in alphabetical order): Acari, Anoplura, Arachnida, Auchenorrhyncha, Blattoptera, Coleoptera, Dermaptera, Diptera, Heteroptera, Hymenoptera, Isoptera, Lepidoptera, Mantodea, Neuroptera, Phasmatodea, Pscoptera, Raphidioptera, Saltatoria (Orthoptera), Scorpioidea, Sternorrhyncha, and Thysanoptera. The diagnosed pathogens belong to 6 groups: viruses, bacteria including rickettsiae, fungi, microsporidia (recently assigned to fungi), protists, and nematodes. Origins (countries, cities) as well as accession-number and -year are also shown. The names of orders, genera, and species of the listed arthropods and pathogens are up to date, but older names and synonyms are also mentioned.

In contrast to the printed version (KLEESPIES, R.G., A.M. HUGER, G. ZIMMERMANN, 2008) the database allows selective search for genera and species of arthropods as well as for pathogens. Furthermore, countries and cities can be checked up and combinations between different items are possible. The aim of this database is to advise interested scientists and experts of entomology, microbiology, biological and integrated control, but also to insect breeders on the occurrence of pathogens and diseases including nematodes with pest and beneficial arthropods. The database will be updated regularly.

All About the Potato Beetle

An applied entomologist has created an informative website exclusively focused on the pest insect *Leptinotarsa decemlineata* (Colorado potato beetle). At
http://potatobeetle.org

A. ALYOKHIN offers a resource including a searchable bibliography, plus sections concerning cultural, physical, biological, and chemical control as well as a discussion of the beetle’s evolving resistance to insecticides and a short summarization of IPM and *L. decemlineata*. In the latter, Dr. ALYOKHIN observes that “the secret of the Colorado potato beetle’s success as a pest is its diverse and flexible life history coupled with a remarkable adaptability,” while noting that integration of multiple control techniques is “the only sustainable way to manage this insect.” Aside from the hard information presented, the site offers a lighter side in a “Memorabilia” section reflecting postage stamps, post cards, and an impressive array of colorful posters all tied (some loosely) to the potato beetle.
Membership Payment

As already announced online payment for 2009 renewal is already possible through the web (http://www.iobc-wprs.org/index_membership_fee_online-payment.html). After some initial problems with the payment, now it works quite well. Until now more than 50 members have already renewed for 2009. It is your opportunity to make it easily. If you did not renew in 2008, you can also do it now !!!. Non members can now apply easily through the application form and payment by credit card (http://www.iobc-wprs.org/index_member.html). In this case do not forget to email me the filled application form.

Digest of the Minutes of the IOBC/WPRS Executive Meeting, Engelberg, July 9-11, 2009

Present: R. Albajes (RA), F. Bigler (FB), S. Blümel (SB), P. Nicot (PN), L. Tirry (LT), H. Vogt (HV)

The Executive Committee met in Switzerland for a short meeting. Major points of discussion were the General Assembly in Agadir, the future of the Publication Commission and a “brain storming” on the future strategy and visions of WPRS. An extract of a few discussion points are reported here:

Statistics on the journal BioControl

- number of articles submitted / year: 200-300
- number of articles published / year: ca 75
- number of pages published / year: ca 900
- number of editors from the different IOBC regions
  - wprs: 9 (2 Institutional, 2 Convenors, 3 Individual, 2 non members)
  - nrs: 1; aprs: 1
- number of reviewers from the different IOBC regions ?
Impact Factor 1.957 for 2008

General Assembly (GA) 2009

Status of planning by local organizer
M. Besri has done a fine job as local organiser. The hotel he selected is managing the reservations with lots of professionalism and courtesy. They were also very helpful with handling the uncertainty concerning the total number of participants.

Programme of GA
The program is pretty much settled.

Budget for GA and information on expected participants
To this date, many invited participants (current Council members / Convenors) have not contacted the hotel to reserve their room. The deadline agreed upon with the hotel is very soon (July 15th).
PN has sent an urgent reminder.

Revision of Statutes of WPRS for GA
Several changes are necessary in the Statutes or Byelaws, in relation to the evolution of the publication Commission and Bulletin production. These changes are reviewed by the Executive Committee. They will be submitted to the Council for endorsement, and then to all IOBC-wprs voting members (via email) for a formal consultation in view of the upcoming General Assembly.

HV will submit the proposed changes to Council, with a requested response deadline of July 17th.
PN will then prepare a final document with the Council-approved proposed changes and send to all voting members for consultation, with a deadline of September 15, 2009 for the votes.

Prepare discussion points for Council/convenor meeting
This meeting will be preceeded by a Convenors’ meeting on September 30th (18:00-20:00) and one on October 3rd (16:30-17:30). A chairman/secretary will be needed for the Convenors’ meeting.

FB will identify a chairman/secretary for the Convenors’ meeting (ask J. ROMEIS who did a fine job during the Barcelona meeting in 2007).

Topics of discussion for the Council / Convenor meeting could include:

- Difference in registration fees charged to IOBC members and non-members for meetings (1.) Enforce it; (2.) discuss increase (membership fee for individuals will be 90 €) – in fact it is a discount for members, rather than an extra fee for non-members.
- Use of the extra funds that are raised from non-members: reminder = to be used directly by Convenor as they want, in respect of the Convenor’s Handbook, and include the use of these funds in the financial report.
- Reminder of the financial report, due December 15th (reminder sent by treasurer November 15th).
- Future increase in reliance upon (already held) responsibility by Convenors for the formate of the Bulletins – consider the establishment of editing committee / possibility of using funds for hiring secretarial help.
The role of the liaison officer: an advisor, a supervisor and a resource person.

Registration fee waiver for the Council Member attending a meeting as Liaison Officer. IOBC/wprs will cover her/his travel and housing costs.

Meetings of the Working Groups: Spirit = nice working atmosphere rather than spectacular large meeting; Registration fees for meetings = no absolute maximum recommended as situations vary, but keep as low as possible, not a money-making business for the local organizer.

Help for the identification of potential new institutional/ supporting/ individual members (e.g. Convenor would provide to Liaison the list of participants to meetings)

Ideas about establishing Training courses

Ideas about consultancy service provided through the IOBC/wprs website

This list will be provided to Convenors prior to their meeting

It will need to be amended/prioritized by Council prior to the meeting with Convenors

Discussion of other issues of GA

Oral presentations. As discussed during the Avignon Executive meeting, oral presentations by Convenors (and others) will need to be respectful of the time allotted. The recommended time for Convenors' presentations will be 8 minutes, to allow for 7 minutes of questions. A limit of 15 slides per Convenor will be suggested. Time keeping will have to be organised and enforced.

PN will send this information to the Convenors and request that they provide their Powerpoint presentation by September 15th.

Auditing Committee report. RA has met with JOST FREULER on July 8th for the examination of the IOBC/wprs accounting. J. FREULER will produce a written Audit report and a presentation for the General Assembly. In case J. FREULER is not able to go to Agadir, the oral report will be needed to be presented by another member of the Auditing Committee (Dr. MOHAMADREZA REZAPANAH will attend).

RA will be in contact with Dr. MOHAMADREZA REZAPANAH concerning this issue.

GA 2009 Bulletin. As was done in the past, a Bulletin will be dedicated to the reports presented and decisions taken during the upcoming General Assembly.

To ensure prompt publication of this Bulletin, the Convenors and the reporting members of the Council / Auditing Committee will be asked to provide their 4-year report before the General Assembly.

The format for the Convenors’ reports will be free (to avoid discouraging creativity), but it shall include items listed in Annex 1.

PN will send this information to the Convenors and request that they provide their written reports by September 15th.

Website and Bulletins

User statistics

The information prepared by the Webmaster is discussed. Several points are suggested to improve the service rendered by the website.
Other issues e.g. links to other websites

Some of the actions planned in Avignon still could be implemented.

Publication commission and edition of the Bulletins

One possibility for the edition of the Bulletins after HORST BATHON’s retirement from the Publication Commission would be the implication of a salaried person.

Horst has identified a person who would have the availability and the competence for this task. The executive committee is grateful to HORST BATHON for his help with this issue.

FB will include the issue of the Publication Commission in the list of topics to be discussed with Convenors and with the new Council

Minutes by Philippe Nicot, Secretary General, 18 July 2009

---

New IOBC/wprs Publications

The Publication Commission of the IOBC/wprs has issued the following Bulletins in 2009 [For Bull. 30(8), 2007, 34, 38 – 40, 2008 and 41, 2009 see Profile 46: 23-43 or visit the IOBC/wprs website]:

IOBC/wprs Bulletin, Vol. 43, 2009

Preface ........................................................................................................................ ............. i
Group and meeting organization ............................................................................................ iii
Contents ............................................................................................................................... v
List of participants ................................................................................................................ xiii
Group picture ......................................................................................................................... xvi

Antagonists screening

Using community and species diversity data to discover novel biocontrol bacteria

Brian B. McSpadden Gardener .................................................................................... 3-6

Can mycoviruses be used for the biocontrol of the plant pathogenic fungus Botrytis cinerea

Michael Pearson, Ross Beever, Barbara Boine, Colin Tan ............................................ 7-10

Endophytes as biological control agents for plant pathogens

David Ezra, Tamir Lousky, Yigal Elad ............................................................. 11-14

Screening of microorganisms with potential activity against Plasmopora viticola

Silvia Dagostin, Davide Gobbin, Tiziano Formolo, Ilaria Pertot .......................... 15-18
Characterisation of microorganisms isolated from summer-wheat and testing for their potential inhibitory effects on *Fusarium graminearum*, causal agent of Fusarium Head Blight (FHB) in laboratory screening-tests

*Birgit Antlinger, Sabine Frühau, Marc Lemmens, Rudolf Braun, Markus Neureiter* ......................................................................................................................... 19-22

Nicotinic acid degradation: a novel method for selection of a biocontrol agent against *Erwinia amylovora*

*Thomas Paternoster, Brion Duffy, Geneviève Défago* ........................................... 23-25

Biological control of walnut blight: screening of antagonistic bacteria for *Xanthomonas arboricola pv. juglandis* and evaluation of their efficacy

*Hatice Ozaktan, Mine Erdal, Ahmet Akkopru, Adem Bozkurt, Emek Aslan* .............. 26-29

Lyso bacter spp. as potential inhibitor of *Rhizoctonia solani* in soil (Abstract)

*Barbara Drigo, Mirjam Schilder, Joeke Postma* .................................................... 30

Screening of actinomycetes from medicinal plant rhizosphere soils for antifungal compounds, indole-3-acetic acid and siderophores production (Abstract)

*Sutthinan Khamna, Akira Yokota, Saisamorn Lumyong* ........................................... 31

Selection of *Pseudomonas* strains that are antagonistic to *Verticillium fungicola*, the causal agent of dry bubble disease in *Agaricus bisporus* (Abstract)

*Roeland L. Berendsen, Peter A.H.M. Bakker* ............................................................. 32

**Molecular/biochemical characterisation and monitoring**

Genotypic comparison of *Pantoea agglomerans* biocontrol and clinical isolates to address taxonomic and bio-safety questions

*Fabio Rezzonico, Theo H.M. Smits, Cosima Pelludat, Emilio Montesinos, Jürg E. Frey, Brion Duffy* ........................................................................................................ 35-39

Molecular characterization of *Ampelomyces* spp. isolates from different hosts and geographic origins and evaluation of their potential to control powdery mildew of cucumber

*Dario Angeli, Elisabetta Pellegrini, Monika Maurhofer, Ilaria Pertot, Susanna Micheli, Denise Ress, Cesare Gessler* ................................................................. 40-44

Antifungal peptides of the biocontrol fungus *Trichoderma atroviride* – detection and structure characterisation by LC/MS/MS

*Rainer Schuhmacher, Norbert Stoppacher, Barbara Reithner, Markus Omann, Susanne Zeilinger, Rudolf Kraska* ................................................................. 45-48

Molecular tools for studying the interaction between *Botrytis* and the viruses BVX and BVF (NZ)

*Barbara Boine, Mike N. Pearson, Ross Beever, Andy Bailey, Gary Foster* .............. 49-52

Quantitative strain specific molecular methods for monitoring and ecological fitness studies of biological control agents

*Emilio Montesinos, Marta Pujol, Esther Badosa* ........................................................... 53-57

Molecular and functional characterization of induced systemic resistance in grape

*Michele Perazzoli, Elisa Bozza, Claudio Moser, Yigal Elad, Ilaria Pertot* .................. 58-61

Molecular and biochemical characterization of Iranian surfactin producing *Bacillus subtilis* isolates

*Salehi Jouzani Ghomreza, Matin Mohamadipour, Maryam Mousivand, Saeed Abbasalizadeh, Mohammad Salari, Naser Panjeh keh* ............................................ 62-66

Molecular characterization of IAA-responsive mutants of plant-beneficial *Pseudomonas fluorescens* CHA0 (Abstract)

*Laurene Rochat, Maria Péchy-Tarr, P. de Werra, Monica Maurhofer, Christoph Keel* ...................................................................................................................... 67

**Enhancement of efficacy**

Development of a genetically-modified mixture of biological control agents for improved disease control
Virginia O. Stockwell, L. Meadow Anderson, Joyce E. Loper, Kenneth B. Johnson ................................................................. 71-74

Introduction of the endochitinase ChiA gene from Serratia plymuthica enhances biocontrol activity of 2,4-DAPG-producing strains of Pseudomonas fluorescens
Inbal Gazit-Fatal, Marianna Ovadis, Rena Gorovits, Ada Viterbo, Ilan Chet, Linda Thomashow, Leonid Chernin ........................................ 75-78

Molecular approaches to improve biocontrol of soil-borne fungal pathogens
Gabriele Berg, Henry Müller, Christin Zachow, Rita Grosch, Leo Eberl, Wolfgang Vogt, Ralf Tilcher ............................................. 79-82

The Trichoderma–plant–pathogen interaction: understanding the mechanism and improving biocontrol
Sheridan L. Woo, Michelina Ruocco, Francesco Vinale, David Turrà, Roberta Marra, S. Lanzuise, Khaled Abadi, Matteo Lorito ........................................ 83-88

Microbial mixtures enhancing plant resistance to pathogen stress
Magdalena Szczech, Beata Kowalska, Barbara Dyki, Marcin Horbowicz, Waldemar Kowalczyk ...................................................... 89-94

Biocontrol of Rhizoctonia solani with improved Trichoderma harzianum strains in tomatoes cropped under glasshouse and commercial conditions
Jaime Montealegre, Soledad Sánchez, Fabián Ochoa Rodrigo Herrera, Ximena Besoain, Luz M. Pérez .............................................. 95-98

Biocontrol mechanisms

Involvement of swollenin, an expansin-like protein from Trichoderma, in mycoparasitism
Ada Viterbo, Yariv Brozman, Eden Briff, Ilan Chet .................................................................................................................. 101-104

A cAMP receptor-like GPCR is involved in Trichoderma atroviride mycoparasitism
Markus Omann, Sylvia Lehner, Kurt Brunner, Marizela Delic, Norbert Stoppacher, Rainer Schuhmacher, Marion Pucher, Susanne Zeilinger ............ 105-108

Analysis of determinants of Pseudomonas fluorescens WCS374r involved in induced systemic resistance in Arabidopsis thaliana
Mohammad Djavaheri, Jesús Mercado-Blanco, L.C. Van Loon, Peter A.H.M. Bakker ........................................................................ 109-112

Mechanisms involved in biocontrol activity of B. Subtilis B49b against Fusarium oxysporum f.sp. radicis-lycopersici
Florica Constantinescu, Gerben Voshol, Guido Bloemberg .................................................... 113-116

Lipopeptides are key factors in the biocontrol activity of Bacillus subtilis towards powdery mildew and bacterial diseases of cucurbits (ES)
Houda Zeriouh, Diego Romero, Laura García-Gutiérrez, Antonio de Vicente, Alejandro Pérez García ................................................ 117-120

Bacillus lipopeptides as MAMPs for non-pathogenic bacteria perception and defense responses elicitation in plant cells
Guillaume Henry, Marc Ongen, Emmanuel Jourdan, Philippe Thonart .......... 121-124

Functional analysis of the grapevine defence reaction against Armillaria mellea infection and the identification of a Phase Change Antifungal Protein
Michele Perazzoli, Federica Bampi, Andrea Nesler, Silvia Faccin, Anna Maria Ciccotti, Ilaria Pertot, Cesare Gessler, Claudio Moser ........................................ 125-128

Role of phenylalanine ammonia-lyase activity in the induced resistance by plant growth promoting rhizobacteria against bean common blight disease (Xanthomonas axonopodis pv. phaseoli)
Adem Bozkurt, Hatice Özaktan .......................................................................................................................... 129-132

Detection of siderophores and indole-3-acetic acid (IAA) production from endophytic fungi, isolated from Thai terrestrial orchid, Pecteilis susannae (L.) Rafin Ruangwut Chutima, Suyanee Vessabutr, Bernard Dell, Pipob Lumyong, Saisamorn Lumyong ........................................................................ 133-136

Biological activity of Pseudomonas syringae toxins against Botrytis cinerea on strawberry fruits
Elisabetta Pellegrini, Carmela Siche, Alberto Fior, Vincenzo Fogliani, Ilaria
Biochemical characterization of bacterial antagonists and immunohistochemical changes after resistance induction in tomato against bacterial wilt caused by *Ralstonia solanacearum*

Henok Kurabachew, Kerstin Wydra

Determination of volatile metabolites of the biocontrol fungus *Trichoderma atroviride* by GC/MS

Bernhard Kluger, Sylvia Lehner, Norbert Stoppacher, Susanne Zeilinger, Rudolf Krksa, Rainer Schuhmacher

The nutrient status of the pathogen can have an impact on the importance of different biocontrol mechanisms in *Pseudomonas fluorescens* CHA0

Matthias P. Lutz, Geneviève Défago, Monica Maurhofer

Expression profiling of *Ampelomyces quisqualis* during mycoparasitism of *Podosphaera xanthii*

Alessandro Ferrari, Alberto Ferrarini, Antonio Chimento, Massimo Delledonne, Monica Maurhofer, Ilaria Pertot

Combining 2,4-diacetylphloroglucinol and pyrrolnitrin activities in *Pseudomonas fluorescens* Q8r1-96 increases its ability to suppress *Rhizoctonia solani*

Irit Moseri, Mohammed Bimerew, Marianna Ovadis, Linda Thomashow, Leonid Chernin

Role of gluconic acid production in phosphate solubilisation, biocontrol ability and rhizosphere competence of *Pseudomonas fluorescens* CHA0 (Abstract)

Patrice de Werra, Maria Péchy-Tarr, L. Rochat, Christoph Keel, Monica Maurhofer

Natural cyclic lipopeptide surfactants: modes of action and effects on plant growth

(Abstract)

Judith E. van de Mortel, Sotirios Vasileiadis, Jos M. Raaijmakers

Regulation of cyclic lipopeptide biosynthesis in *Pseudomonas fluorescens* (Abstract)

Irene de Bruijn, Jos M. Raaijmakers

Insecticidal activity in root-associated *Pseudomonads* (Abstract)

Maria Péchy-Tarr, Joyce E. Loper, Monica Maurhofer, Christoph Keel

Do chitosan oligomers protect plants against *Botrytis cinerea* infections? (Abstract)

Md. Hafizur Rahman, Linda Hjeljord, Morten Sørli, Arne Tronsmo

Understanding the plant-endophytic bacteria interaction in the model: *Burkholderia phytofirmans* strain PsJSN and *Vitis vinifera* L. (Abstract)

Stéphane Compart, Helene Lacroix, Christophe Clément, E.A. Barka

Age dependent changes of enzymatic response in cotton plants at interaction with pathogen *Verticillium dahlia* (Abstract)

Gulyamova Tashkhan, M. Ruzieva Dilorom, S.M. Nasmetova, A.M. Kerbalaeva, J.J. Tashpulatov, S.M. Khodijbaeva

Molecular and biochemical analysis of soil suppressiveness to *Rhizoctonia* root rot (Abstract)

Marco Krujit, Nurmi P.D. Pangesti, Nabin Sharma, Hans Schneider, Jos M. Raaijmakers

Regulation of the Fit locus encoding a novel insect toxin in the root-associated *Pseudomonas fluorescens* biocontrol agent CHA0 (Abstract)

Maria Péchy-Tarr, Monica Maurhofer, Christoph Keel

Bacillus amyloliquefaciens strain antagonistic to *Erwinia amylovora* and elicitor of tomato defense response (Abstract)

Florin Oancea, Petruta Comea, Gabriela Popa, Oana Sicuia, Maria Draganoiu, Sorina Dinu

Characterization of a novel toxin produced by the potential biocontrol organism *Pseudomonas syringae* pv. *syringae* 22d/93 (Abstract)
New bioactive compounds for the development of natural plant protection products
(Abtract)
Alexandra Parich, Rainer Schuhmacher, Michael Sulyok, Markus Neureither, Sabine Fruehau, Andrea Koutrin, Birgit Antlinger, Marc Lemmens ................................. 174

Location of the dar operon in the biocontrol rhizobacteria Pseudomonas fluorescens PCL1606 and its role in production of the antibiotic 2-hexyl, 5-propyl resorcinol
(Abtract)
Rosa Martin-Pérez, Nuria Bonilla, Juan C. Codina, Antonio de Vicente, Francisco M. Cazorla .................................................................................................................. 175

General biological control

Critical factors in the large-scale application of a microbial biocontrol agent in horticultural growing media (NL)
Marlies Dissevelt and Willem Ravensberg ................................................................. 179-183
Trichoderma atroviride SC1 for biocontrol of fungal diseases in plants
Ilaria Pertot, Claudia Maria Oliveira Longa, Federica Savazzini, Lorenza Michelon, Daniele Prodrutti, Chiara Pellegrini, Alessandro Ferrari ........................................... 185-188
Biocontrol management in soilless culture: impact of the antagonist Pythium oligandrum on native fungal populations
Jessica Vallance, Gaétan Le Floch, Franck Déniel, Patrice Rey ................................. 189-192
Effects of in vitro antagonists of Rhizoctonia solani AG 1-IB on lettuce bottom rot disease and on microbial rhizosphere communities
Rita Grosch, Modupe Adesina, Kornelia Smalla .......................................................... 193-196
The non pathogenic Fusarium isolate Fo47 protects pepper plants against Verticillium dahliae
Javier Veloso, José Díaz........................................................................................................ 197-200
A new biocontrol agent against B. cinerea and other plant pathogens
Rudi Aerts, Liesbeth Vogels, Kathleen Heyens, Miguel F.C. De Bolle, Bruno P.A. Cammue ........................................................................................................ 201-205
Biocontrol of Armillaria root rot on highbush blueberry in Italy
Daniele Prodrutti, Alberto Pellegrini, Ilaria Pertot ................................................................ 207-210
Fungal isolates of the order Sebacinales provide growth promotion and systemic disease resistance to barley
Monica Sharma, Karl-Heinz Kogel ................................................................................. 211-215
Antifungal activity of Salvia officinalis extract against Plasmopara viticola
Silvia Dagostin, Tiziano Formolo, Oscar Giovannini, Annegret Schmitt, Ilaria Pertot .................................................................................................................. 217-220
Control of Ralstonia solanacearum in Curcuma alismatifolia Gagnep. by antagonistic bacteria
Saran Promsai, Narumol Thongwai............................................................................... 221-224
In vitro and in planta suppression of oncogenic strains of Agrobacterium vitis and Agrobacterium tumefaciens by bacterial biocontrol agents
Natalia Dandurishvili, Emő Szegedi, Pikria Eliashvili, Naili Giorgobiani, Inessa Khmel, Alexander Vainstein, Leonid Chernin ................................................................. 225-229
Biological control of avocado root rots by suppressive organic amendments
Nuria Bonilla, Juan Antonio Torés, José Maria Hermoso, Jorge González, Francisco Manuel Cazorla, Antonio de Vicente ................................................................. 231-234
Trichoderma in Brazil: history, research, commercialization and perspectives
Wagner Bettiol, Marcelo A.B. Morandi ............................................................................ 235-237
Control of Fusarium in chrysanthemum with sewage sludge, biofertilizer, hydrolyzed fish, chitosan, and Trichoderma
Wagner Bettiol, Zayame Vegeete Pinto ...................................................................... 239-242
Biological control of *Sclerotinia sclerotiorum* on beans in field by *Trichoderma asperellum* and *Clonostachys rosea*

*Marcelo A.B. Morandi, Lucio B. Costa* ........................................................................................................ 243-246

Natural biological control of chestnut blight in Croatia

*Ljiljana Krstin, Sanja Novak Agbaba, Daniel Rigling, Mirna Ćurković Perica* ...... 247-250

Antagonistic potential of *Trichoderma* isolates against soil and seed borne pathogens in vitro

*Asha Shivpuri, S.N. Mali* .................................................................................................................. 251-254

Inhibition of cotton pathogens by natural antagonists

*Rustam Mannanov, Rano Sattarov* ..................................................................................................... 255-258

Use of *Trichoderma atroviride* SC1 inoculated barks to control Armillaria root rot in highbush blueberry orchards

*Alberto Pellegrini, Daniele Prodonutti, Chiara Pellegrini, Thomas Paternoster, Veronica Leoni, Ilaria Pertot* .................................................................................................................. 259-262

Double role of *Metschnikowia fructicola*: biocontrol agent of *Botrytis cinerea* and repellant to *Lobesia botrana*

*Marco Tasin, Carmela Sicher, Alketa Zeqiri, Vito Simeone, Ilaria Pertot* ............ 263-266

Alternative biological treatments against *Rhizoctonia solani* in radish

*François Lefort, T. Mormentyn, G. Calmin* ........................................................................ 267-270

Microorganisms associated with *Chara hispida* L. show a high antagonistic potential towards bacteria

*Gabriele Berg, Martin Hagemann* ................................................................. 271-275

Use of a bacterial antagonist for the biological control of bacterial leaf/fruit spot of stone fruits.

*Enrico Biondi, Davide Dallai, Agostino Brunelli, Carlo Bazzi, Emilio Stefani* ...... 277-281

Field studies on biological control of the walnut blight

*Bernard J. Blum, Isabelle Chavignier, William Chauvin* ................................................. 283-286

Bacteriophages for biocontrol of *Erwinia amylovora* (Abstract)

*Lars Fieseler, Y. Born, Brion Duffy, M.J. Loessner* ........................................ 287

Biological control of cucurbit powdery mildew by plant growth-promoting rhizobacteria (Abstract)

*L. García-Gutiérrez, D. Romero, Houda Zeriouh, A. de Vicente, A. Pérez-García* .................................................................................................................. 288

Characterization of the potential biocontrol organism *Pantoea agglomerans* 48b/90 (Abstract)

*Ulrike Sammer, Beate Völksch, Dieter Spiteller* ...................................................... 289

**Antagonist-plant-microbial/abiotic environment interactions**

Molecular mechanisms involved in controlling nematode infection in crops by introducing mutualistic endophytic fungi

*Alexander Schouten, Andreas Kurtz, Andrea Ditzer, Richard A. Sikora* .............. 293-296

Understanding mutitrophic interactions to facilitate successful biocontrol of plant parasitic nematodes with *Paecilomyces lilacinus* strain 251

*Sebastian Kiewnick* ........................................................................................................ 297-299

Defense pathways activated by *Bacillus mojavensis* isolate 203-7 and *B. mycoides* isolate BmJ as elucidated by *Arabidopsis thaliana* mutants

*Oliver T. Neher and Barry J. Jacobsen* ................................................................. 301-305

Beneficial *Pseudomonas* spp. have altered root colonization on *Arabidopsis thaliana* mutants affected in the expression of induced systemic resistance

*Rogier F. Doornbos, L.C. Van Loon, Peter A.H.M. Bakker* ...................................................... 307-310

Absolute quantification of specific plant defense pathways and disease development of several microbial pathogens on *Arabidopsis* using real-time PCR

*Benoît Boachon, Jérôme Robert, Xavier Daniel, Brigitte Mauch-Mani* .................. 311-316

Influence of rhizosphere-specific parameters on surfactin production by *Bacillus subtilis*

*Marc Ongena, Venant Niyorimbere, Patrick Fickers, Philippe Thonart* ..................... 317-320
Genotype-level interactions determine the degree of reduction of leaf rust on wheat by seed application of beneficial pseudomonads
Abbas Sharifi-Tehrani, Stefan Kellenberger, Mohsen Farzaneh, Maria Pechy-Tarr, Christoph Keel, Fabio Mascher ................................................................. 321-325

cDNA-AFLP analysis of Candida oleophila (strain O) genes differentially expressed during the biocontrol of Botrytis cinerea on harvested apples
Mohammed Bajji, M. Haïssam Jijakli ................................................................ 327-330

Are type III secretion systems found in fluorescent pseudomonads involved in plant colonization or biocontrol?
Fabio Rezzonico, Davide Gobbin ................................................................. 331-335

Molecular tools to analyze the influence of environmental factors on the genetic diversity and the plant-beneficial activity of root-colonizing pseudomonads (Abstract)
Joana Meyer, P. de Werra, M. Frapolli, Maria Pêchy-Tarr, L. Rochat, Christoph Keel, Monica Maurhofer ........................................................................ 336

Investigation of primed physiological status of grapevine plantlets (Vitis vinifera L.) induced by PGPR Burkholderia phytofirmans strain PsJN under low non-freezing temperatures (Abstract)
A. Theocharis, F. Baillieux, Helene Lacroix, J. Nowak, C. Clément, E. Ait Barka ....... 337

The role of phytohormones in basal resistance and Trichoderma-induced systemic resistance to Botrytis cinerea in Arabidopsis thaliana (Abstract)
Nadia Korolev, Dalia Ray David, Yigal Elad .................................................. 338

Molecular dialogues and defense mechanisms in bacteria/protozoa interactions (Abstract)
Mark Mazzola, Irene de Bruijn, Jos M. Raaijmakers ................................................ 339

Molecular ecology and impact assessment

The fungal community associated with Vitis vinifera: development of molecular probes for observation of its evolution in symptomatic and asymptomatic wood
Valérie Hofstetter, Leonardo Casieri, Katia Gindro, Olivier Viret ......................... 343-346

Comparison of effects of chemical and microbial biocontrol agents on non-target microbial soil organisms
Jacqueline W.A. Scheepmaker ........................................................................... 347-349

Grapevine-associated microorganisms: Antagonistic potential towards Botrytis cinerea varies between habitats, cultivation methods and grapevine species
Florian Schmid, Gabriele Berg ........................................................................... 351-354

Detection and differentiation of antagonistic Erwinia species by PCR and MALDI TOF analyses
Klaus Geider, Isabel Gehring, Annette Wensing, Anja Freiwald, Sascha Sauer. 355-358

Detection and quantification of biocontrol agents
Inmaculada Larena, Paloma Melgarejo ............................................................ 359-362

Impact of the biocontrol agent Trichoderma atroviride SC1 on microbial soil communities of a vineyard
Federica Savazzini, Claudia Maria Oliveira-Longa, Illaria Pertot .......................... 363-367

Does biocontrol need to consider side effects? Phylloplane chemical changes induced by a BC-yeast preparation and effect on Cydia pomonella (Abstract)
Cesare Gessler, Aude Alaphilippe, Sylvie Derridj, Yigal Elad ............................... 368

Environmental monitoring of Ceratocystis platani, agent of the plane canker, by molecular diagnostic in the Lake Geneva region (Abstract)
François Lefort, P. Zryd D. Weyland, G. Calmin, L. Belbahri ............................. 369

Use of DGGE analysis to study the impact of genetically modified wheat on the genetic diversity of root-colonizing Pseudomonads associated with soil fertility (Abstract)
Joana Meyer, Christoph Keel, Monica Maurhofer .............................................. 370
Detection and quantification of *Pseudomonas fluorescens* biocontrol strains by a strain specific real-time PCR approach in the field (Abstract)

*Mauro Lorenzon, Alberto Pozzebon, Carlo Dusuo* ........................................... 45-49

Biological control of the old world date mite, *Oligonychus australis*, using indigenous predatory mites in the Southern Arava Valley of Israel
*Alon Lotan, Eric Palevsky, Ido Izhaki* .................................................................. 51-52

The spider mite *Neotetranychus rubi* (Träg.) a potential prey for the predatory mite *Amblyseius andersonii* (Chant)
*Valeria Malagnini, Alberto Grassi, Romano Maines, Gino Angeli, Claudio Ioriatti, Carlo Duso* ............................................................. 53-55

Integrated pest management of *Oligonychus perseae*: developing action thresholds and the identification and conservation of natural enemies
*Yonattan Maoz, Eric Palevsky, Shira Gal, Miriam Zilberstein, Michael Noy, Yehonatan Izhar, Jonathan Abrahams Samuel Gan-Mor, Moshe Coll* .............. 57-60

The two-spotted mite *Tetranychus urticae* Koch (Acari: Prostigmata) on citrus Clementine groves: seasonal trends and control strategies
*María Teresa Martínez-Ferrer, José Miguel Campos, José Miguel Fibla* .................. 61

The Phytoseiidae in biological control: relevance of taxonomic classification and life style categorization
*James A. McMurtry* ................................................................................................ 62

Whitefly-induced plant defences in cucumber and their impact on biological control of spider mites
*Gerben J. Messelink, Arne Janssen* ................................................................. 63

Failure of methyl bromide fumigations to exterminate mites present on grapes exported to Mexico from Chile
*Gabriel Otero-Colina, Francisco Ramírez y Ramírez, Héctor Enrique Vega Ortiz* ...... 64

Mutual interference of *Scolothrips longicornis* Priesner (Thysanoptera: Thripidae) with *Tetranychus urticae* Koch (Acari: Tetranychidae)
*Hajar Pakyari, Yaghoub Fathipour* .................................................................... 65-68

Predator-prey dynamics and strategies for control of the red palm mite (*Raoiella indica*) (Acari: Tenuipalpidae) in areas of invasion in the Neotropics
*Jorge E. Peña, Jose Carlos N. Rodrigues, Amy Roda, Daniel Carrillo and Lance*
The association between the red palm weevil *Rhyncophorus ferrugineus* (Olivier) and its phoretic mites: *Centrouropoda almerodai* Hiramatsu & Hirchmann and *Uroobovella (Fuscuropoda) marginata* (Koch)

**S. Osborne** ............................................................................................................... 69-79

How homogeneous are *Tetranychus urticae* populations in citrus orchards?

Preliminary isolation and characterization of polymorphic microsatellite markers for *T. urticae* (Acari: Prostigmata)

**Beatriz Sabater-Muñoz, Sara Pascual-Ruiz, Josep A. Jacas, Mónica A. Hurtado** ...... 80

Spider mite control in California vineyards with conventional acaricides

**Francisco J. Sáenz-de-Cabezón Irigaray, Frank G. Zalom, Nicole Nicola** ................. 81

Multiple predators, intraguild interactions and biological control of a single spider mite species

**Maurice W. Sabelis, Rachid Hanna, Alexis Onzo, Angelo Pallini, Ibrahim Cakmak and Arne Janssen** ........................................................................................................ 83-94

Comparative repellent effects of different acaricide residues to predatory and spider mites. Is there a need for including behavior into standardized testing methods?

**Francisco J. Sáenz-de-Cabezón Irigaray, Frank G. Zalom** ........................................ 95-98

Spatial refuge use by herbivorous mites poses major challenges for biological control

**Peter Schausberger** .................................................................................................. 99-100

**Neoseiulus californicus** and **Beauveria bassiana**: a proficuous coexistence?

**Sauro Simoni, Silvia Guidi, Franca Tarchi** ................................................................ 101

Demographic testing reveals complex effects of pesticides on biological control of Pacific spider mite (*Tetranychus pacificus*) by the western predatory mite (*Galendromus occidentalis*) on grape plants

**Menelaos C. Stavrinides, Nicholas J. Mills** .................................................................. 102

Classical biological control of the red palm mite (*Raoiella indica*): area of origin and preliminary surveys

**Bryony Taylor** ........................................................................................................... 103-105

Phytoseiid mites associated with forest trees in two “Natura 2000” locations: S. Adriano woods (Sicily) and Fraktò virgin forest (Greece)

**Haralabos Tsolakis, Salvatore Ragusa** ................................................................. 106

Oviposition behavior of *Phytoseiulus persimilis* facing the risk of intraguild predation

**Andreas Walzer, Peter Schausberger** ....................................................................... 107-112

Predator cues induce behavioral shifts in alternative prey: consequences for prey life history traits and its host plant

**Andreas Walzer, Peter Schausberger** ....................................................................... 113-117

Novel application of pollen to augment the predator *Amblyseius swirskii* on greenhouse sweet pepper

**Phyllis Weintraub, Sophia Kleitman, Rafi Mori, Samuel Gan-Mor, Liana Ganot, Eric Palevsky** ............................................................................................................. 119-124

Effect of host plant on the functional response of *Orius albidipennis* (Hemiptera: Anthocoridae) to *Tetranychus urticae* (Acari: Tetranychidae)

**Abbas Ali Zamani, Shabnam Vafaei, Reza Vafaei, Shila Goldasteh, Katayoon Kheradmand** ......................................................................................................................... 125-129

*Aceria carvi* – potential threat for caraway production in Europe?

**Rostislav Zemek, Erja Huusela-Veistola** .................................................................... 131-134

The regular prices for the Bulletins are:

- up to 100 pages/Bulletin: 10 € per copy
- up to 300 pages/Bulletin: 15 € per copy
- > 300 pages/Bulletin: 30 € per copy
You can find an order form for Bulletins in our website: www.iobc-wprs.org/pub/index.html

Mailing costs will be added. If you pay by check, please add 6.00 EURO for banking fees. If you pay by money-order please make sure that all costs are dept to you.

Other interesting publications brought to attention of Profile

**IOBC-Global Newsletter 85** – May 2009

**Sting 32** – September 2008
Newsletter on biological control in greenhouses of the IOBC/WPRS WG “Integrated control in Protected Crops, Temperate Climate”
http://web.agrsci.dk/plb/iobc/sting/sting32.pdf

Time-Table of forthcoming events

For the Meetings of the IOBC/wprs Working Groups see also the IOBC/wprs homepage: http://www.iobc-wprs.org

6 - 9 September 2009: *Harmonia axyridis and other invasive ladybirds*. IOBC/wprs Study Group “Benefits and risks of biological control”, Engelberg (Switzerland). – Marc Kenis, Delémont (Switzerland), CABI Europe-Switzerland, 1, Rue des Grillons, 2800 Delémont (Switzerland), Tel +41-32-4214884, Fax: +41-32-4214871, m.kenis@cabi.org, info@iobc-harmonia-meeting.com, www.iobc-harmonia-meeting.com

6 - 11 September 2009: Working Group “Integrated Control in Protected Crops, Mediterranean Climate”, Chania, Crete (Greece). – Dr. Cristina Castañé, e-mail: Cristina.Castane@irta.es and/or Dr. Dionyssios Perdikis, e-mail: dperdikis@aua.gr http://www.aua.gr/IOBC

30 September – 3 October, 2009: General Assembly of IOBC/wprs in Agadir (Morocco)

3 - 8 October 2009: Joint Meeting of the WPRS Working Group “‘Pheromones and other semiochemicals in integrated production” and EPRS Working Group “Selective Control Methods", Budapest (Hungary). – Miklós Tóth (Plant Protection Institute, HAS, POB 102, Budapest, 1525 Hungary, Tel +36-1-3918639, Fax: +36-1-3918655, e-mail: h2371tot@ella.hu, – Marco Tasin (FEM-IASMA Research Center,
7 - 9 October, 2009: IOBC/wprs Working Group “Pesticides and Beneficial Organisms”, Dubrovnik (CROATIA). – Local Organizer: Dr. Božena Barić, Department for Agricultural Zoology, Faculty of Agriculture, Zagreb. – Dr. Ir. J.-P. Jansen (Convenor), CRA-W, Departement Lutte biologique et Ressources phytogénétiques, Laboratoire d’Ecotoxicologie, 2, Chemin de Liroux, 5030 Gembloux, (Belgique), Tel + 32 (0)81 625 683, e-mail: labecotox@cra.wallonie.be

15 - 20 November 2009: „Semio-chemicals Without Borders“. Joint Conference of the Pheromone Groups of IOBC/WPRS and IOBC/EPRS. Budapest (Hungary). – IOBCferoconf09@julia-nki.hu, Miklós Tóth, e-mail: h2371tot@ella.hu or Marco Tasin, e-mail: marco.tasin@iasma.it

2010

An internal information carrier issued by the Information Service of IWPRS Council
Editors E.F. Holler

No. 1 January 1984

In this issue:

Editorial: Message of President and Editor ... ... ... ... 2
Re-organisation of Council and arrangements for appointing the new Secretary General ... ... ... ... 3
IWPRS Council and Executive Committee: Decisions and Plans ... ... 4
Three new Institutional Members join IWPRS ... ... ... ... 5
Is a new category of membership emerging?
Joint Activities of IWPRS with other Organizations ... ... ... 5
Commissions and Working Groups: ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... 6
Major events summarized. Three new Working Groups established.
The problem of weed control discussed. Comments encouraged to increase collaboration and interface with other Working Groups.
Global EBRC Working Groups ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... 8
Timetable of forthcoming Events ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... ... 10
A "Feedback-Page" to be sent back to the Editor ... ... ... 11
